

The manifold requirements and philosophies surrounding metallurgical processes, flexibility in the production process and constant dialog with our customers have always been our main focus.

Electric Arc and Ladle Furnace Water cooled panels in steel / copper / combination
Water cooled roof
Combustion chamber and water cooled fume ducts
Platforms, upper and lower shell

Steel Plant Equipment Transfer cars for ladles, buckets and tundishes
Hot metal ladles, teaming ladles and scrap buckets

Special Items Components for vacuum, ESU and ESR equipment,
e.g. stainless steel hoods, guiding units, covers

Auxiliary Equipment Equipment for ladle preparation area
Wrecking, gunning, fettling machines
Special tools and machinery for refractory lining
Stirring gas flow control systems including
Automatic coupling systems for ladle
Ladle and tundish preheating devices with
state-of-the-art burner technology

Spare and Wear Parts Mechanical items for the steel industry
and all kinds of components thereof

Our clear company structure as well as our conscientious and reliable employees ensure minimal processing time and help to create the possibility of new investments in the future.

We offer a wide spectrum of products and services in order to develop an individual concept for our customers.

	Product line	Application area
	Steel making	Fill BT Harth xx Frit xx/Gun HW xx Tap hole filling material for EBT Dry ramming material for hearth Gunning and fettling material for hot and cold repair
	Ladle	Components for ladle slide gate mechanisms Slide gate refractories: well blocks, inner nozzles, SG plates, collector-nozzles, mortars for SG refractories
	Continuous Casting	Cast B xx Gun B xx TUN xx TS Monolithic permanent tundish lining Repair material for permanent lining Spray masses for working lining Dams, wears, well blocks, guide pots, designed to optimize the tundish flow pattern, heat distribution and to reduce inclusions
		Isostatic Products Ladle shrouds, stoppers with and without Argon, subentry shrouds, subentry nozzles and submerged shrouds
		Light powder Covering powder for tundish and ladles
		CPG xxxx All kind of granulated casting powders covering the complete range of C-steel grades
	Ingot Casting	Thermo Speed Mag III ZK/VK/FL exo VK/FL/PG iso Cavity powder Exothermic covering agent Exothermic covering plates Isolating plates
	Metallurgy	Syntop AK/AKS Schweflex Synthetic and pre melted slag for secondary metallurgy Desulphurization agent

HEGUSA cooperates with various production plants and technical offices, allowing us to offer tailor made solutions and design for our customer needs regarding the optimization of metallurgical processes, productivity, use of materials and sequences.
